EXPERIENCE

CISCO(FINANCE IT) | SOFTWARE DEVELOPER III

Nov 2023 – Present | Bangalore, India

- Designed and developed an application to report Remaining Performance Obligations (**RPO**) across Cisco's active subscriptions, achieving **99.99%** accuracy for **Wall Street** financial reporting.
- Designed and developed a scalable, low-latency Usage Reporting API using Java, Spring Boot, Kafka, and MongoDB for Cisco B2B partners to invoice end customers, handling **1 million requests** per hour.
- Assumed the additional role of Partner Security Advocate, driving vulnerability remediation efforts and achieving a **100% YTD closure rate** for the team's security findings.
- Consolidated distributed data workflow orchestration onto **Apache Airflow**, replacing multiple commercial platforms and reducing operational complexity and licensing costs.

CISCO (FINANCE IT) | SOFTWARE DEVELOPER II

Nov 2022 – Oct 2023 | Bangalore, India

- Migrated Cisco SaaS product provisioning application to a microservices architecture, enhancing scalability and supporting **99.99%** service availability.
- Led Scrum ceremonies during organizational restructuring, ensuring uninterrupted delivery across multiple workstreams.
- Mentored Interns and guided a Junior SDE to onboard into team's technical processes.

CISCO (FINANCE IT) | SOFTWARE DEVELOPER I

Aug 2021 – Oct 2022 | Bangalore, India

- Designed and developed an event-driven, distributed **GDPR-compliant** SaaS usage tracking framework for Cisco products, including automated data migration pipelines for legacy systems.
- Developed a fault-tolerant CyberArk Conjur-OpenShift secret synchronizer for automated secret management.

CISCO (LIFECYCLE IT) | TECHNICAL UNDERGRADUATE INTERN

Jan 2021 – Jul 2021 | Bangalore, India

- Built a **B2B API** platform for Cisco's partners, streamlining invoice workflows and reducing payment turnaround time by **2 weeks**.

PROJECTS

RESUME COMPACT | MAY 2026

- Developed an AI-powered recruitment automation platform using Python, LangChain, OCR, and Pydantic that automates resume parsing and candidate evaluation, reducing screening time by up to 80% and generating structured hiring insights as a part of AMD AI Hackathon.

SCREENSORTS | MAY 2026

- Developed Screensorts, a native macOS app leveraging on-device AI for semantic screenshot search and tagging, achieving **#11 Product of the Day** on Product Hunt.

EDUCATION

AMRITA SCHOOL OF ENGINEERING, AMRITA

VISHWA VIDYAPEETHAM

BACHELOR OF TECHNOLOGY IN COMPUTER SCIENCE AND ENGINEERING

Aug 2021 | Coimbatore, India

- Cum. GPA: **9.16 / 10**
- **90%** Merit Scholarship
- **CCDSAP** Certified
- Smart India Hackathon Finalist and Runner Up

SKILLS

PROGRAMMING

- Java • Python • JavaScript
- C/C++ • Kotlin • Golang

LIBRARIES/Frameworks

- Springboot • React • Flask • Node.js • J2EE • Apache Camel
- Express • FastAPI

TOOLS/PLATFORMS

- Git • Jenkins • Kubernetes • Heroku • Travis CI • Docker • Linux • AWS • GCP
- Apache Kafka • OpenTelemetry • RabbitMQ • Splunk • Conjur • OpenShift

DATABASES

- Oracle • MongoDB • PostgresDB • InfluxDB • Firebase • MySQL

COURSEWORK

Data Structures and Algorithms
Operating Systems
Database Management Systems
Big Data
Machine Learning
Android App Development

ADDITIONAL PROJECTS

- An AI-powered **Splunk** based event generator for error alert mechanisms using oTel traces
- A regression test suite which automates and load tests cross functional components built using **Locust**, **Mountebank** and **Python**
- Anokha Mobile App – Official Amrita University application for event registration, ticketing, and payments.
